6. (Currently Amended) The apparatus system of claim 5, wherein the information relating to the use of the received broadcast content comprises a duration of use.

7. (Currently Amended) A method ~~for controlling the use of broadcast content, said method~~ comprising:  
receiving broadcast content;  
extracting control information from the received broadcast content, said extracted control information defining an action to be taken pertaining to said broadcast content;  
controlling use of the received broadcast content in accordance with the extracted control information.

8. (Original) The method of claim 7, wherein the extracted control information comprises an authorization to store the received broadcast content.

9. (Original) The method of claim 7, wherein the extracted control information indicates a number of times that the received broadcast content may be consumed.

10. (Original) The method of claim 7, wherein the extracted control information indicates a length of time that the received broadcast content may be consumed.

11. (Original) The method of claim 7, wherein the extracted control information indicates a time period during which the received broadcast content may be consumed.

12. (Original) The method of claim 11, wherein the time period comprises a date range.

13. (Original) The method of claim 7, wherein the extracted control information comprises billing information.

14. (Original) The method of claim 13, wherein the billing information comprises a cost for consumption of the broadcast content.

15. (Original) The method of claim 7, wherein said controlling use comprises preventing use of the broadcast content other than as specified by the extracted control information.

16. (Original) The method of claim 7, further comprising obtaining payment information from a user of the received broadcast content.

17. (Original) The method of claim 7, further comprising communicating consumption information to a billing facility.

18. (Original) The method of claim 17, wherein the billing facility comprises a facility maintained by a provider of the received broadcast content.
